INDEX TO VOLUME XXIX.

A.

Absorption of Gases by the Anode in a Glow Current, *V. L. Chrisler*, 461.

Allen, S. J., On the Secondary Radiation Produced from Solids, Solutions, and Pure Liquids, by the β Rays of Radium, 177.

Alternating Currents, Vector Representation of Non-harmonic, *Bunroku Arakawa*, 409.

Anode, Absorption of Gases by the, in a Glow Current, *V. L. Chrisler*, 461.

Anode Drop with Hot CaO Cathode, *C. D. Child*, 351.

American Physical Society (see Physical Society).

Account of the Treasurer for 1908, 87.

Abstracts, 81, 552.

Minutes, 552.

Arakawa, Bunroku, Vector Representation of Non-harmonic Alternating Currents, 409.

Arc, Counter Electromotive Force in the Electric, *C. D. Child*, 229.

Atmosphere, Distribution of Gases in the, *W. J. Humphreys*, 83.

B.

Ballistic Electrodynamometer, The, as an Instrument for Testing Iron, *Martin E. Rice* and *Burton McCollum*, 132.

Barus, C., The Secular Softening of Hard Steel, 516.

Birge, R. T., A Study of the Reflecting Power of Metals as Dependent on the Refractive Index of the Surrounding Medium, 392.

Bjerknes, V., On the Absolute Measurement of Electromagnetic Quantities, 310.

Book Reviews:

An Elementary Manual of Radiotelegraphy and Radiotelephony for Students and Operators, *Fleming*, 88.

Light and Sound, *Franklin* and *MacNutt*, 328.

Direct and Alternating Current Testing, *Bedell*, 328.

Les Decouvertes modernes en Physique, *Manville*, 328.

Tables and Diagrams of the Thermal Properties of Saturated and Superheated Steam, *Marks* and *Davis*, 328.

The Natural History of Igneous Rocks, *Harker*, 328.

General Lectures on Electrical Engineering, *Steinmetz*, 328.

Alternating Current Machines, *Sheldon*, *Mason* and *Hausmann*, 328.

The Periodic Law and the Hydrogen Spectrum, *Kemble* and *Underhill*, 328.

A Text Book of Physics, *Duff*, 328.

Elementary Electrical Calculations, *Sloane*, 328.

Les Bases Physico-chimiques de La Chimie Analytique, *Herz*, 328.

Lehrbuch der Physik, *Grimsehl*, 328.

Introduction à l'Étude de la Thermodynamique, *Blondlot*, 328.

Bradley, W. P., The Nozzle Expansion of Air at High Pressure, 258.

Brant, Laura C., The Softening of Cold, Glass-Hard Steel, in Twenty-four Years, 494.

Brown, F. C., The Kinetic Energy of the Positive Ions Emitted from Hot Bodies, 86.

Brown, S. LeRoy, The Residual of Inductance and Capacity in Resistance Coils. A Standard Resistance with Balanced Inductance and Capacity 369.

Burrows, Charles W., Methods and Errors in Magnetic Measurements, 84.

C.

Capacity, The Residual of Inductance and, in Resistance Coils. A Standard Resistance with Balanced Inductance and Capacity, *S. LeRoy Brown*, 369.

Chamberlain, C. W., Achromatism of Interference, 84.

A Spectroscope of High Resolving Power, 87.

Child, C. D., Anode Drop with Hot CaO Cathode, 351.

Counter Electromotive Force in the Electric Arc, 229.

Chrisler, V. L., Absorption of Gases by the Anode in a Glow Current, 461.

Cloud Method, A Modification of the, of Measuring the Elementary Electrical Charge, and the Most Probable Value of that Charge, *R. A. Millikan*, 560.

Coblentz, Wm. W., A Characteristic of Spectral Energy Curves, 553.

A Thermoluminescent Glass, 561.

Concentration Cells, Application of Gibbs-Helmholtz Equation to, *Frank J. Mellencamp*, 329.

Constant Deviation Prisms, On the Rotation of, *H. S. Uhler*, 37.

Counter Electromotive Force in the Electric Arc, *C. D. Child*, 229.

Crystal Rectifiers for Electric Currents and Electric Oscillations. Part III. Iron Pyrites, *George W. Pierce*, 487.

Crystal and Solid Contact Rectifiers, *Alan E. Flowers*, 445.

D.

Davis, Harvey N., The Critical Density of Water, 81.

Discharge in Gases, The Effect of Temperature Variations on the Luminous, for Low Pressure, *R. F. Earhart*, 293.

Dispersion, Dispersion of Electric Double Refraction and Ordinary, in Liquids, *Harold E. McComb*, 525.

E.

Earhart, R. F., The Effect of Temperature Variations on the Luminous Discharge in Gases for Low Pressure, 293.

Electric Double Refraction, Dispersion of, and Ordinary Dispersion in Liquids, *Harold E. McComb*, 525.

Electric Double Refraction, Dispersion of Magnetic Double Refraction in Liquids Compared with that of, *C. A. Skinner*, 541.

Electric Oscillations, Crystal Rectifiers for Electric Currents and, Part III., Iron Pyrites, *George W. Pierce*, 487.

Electric Waves, A Systematic Study of Vibrators and Receivers for Short, *Harold W. Webb* and *L. E. Woodman*, 89.

Electrical Oscillations, The Effect of, on the Conductivity Imparted to Gases by an Incandescent Cathode, *Orin Tugman*, 154.

Electromagnetic Quantities, On the Absolute Measurement of, *V. Bjerknes*, 310.

Electrons, The Reflection of Low-Speed, by Metal Surfaces, *O. W. Richardson*, 557.

Electrolytic Detector, Studied with the Aid of an Oscillograph, *George W. Pierce*, 56.

Electrostatic Effect, On the, of a Changing Magnetic Field, *J. M. Kuehne*, 558.

Entladungsstrahlen, Ionization Produced by, and Experiments on the Nature of the Radiation, *Elizabeth R. Laird*, 559.

Erbium, On the Possible Radioactivity of, *W. W. Strong*, 170.

Errata, 568.

Expansion of Air, The Nozzle, at High Pressure, *W. P. Bradley* and *C. F. Hale*, 258.

F.

Fisher, Willard J., The Molecular and the Frictional Flow of Gases in Tubes, 325.

The Temperature Coefficients of Gas Viscosity, IV., 147.

Flowers, Alan E., Crystal and Solid Contact Rectifiers, 445.

Frequency Meter, A Thermo-hysteretic, and the Application of Differential Thermo-junctions to A.C.–D.C. Comparison, *C. E. Hiatt*, 432.

G.

Gas, On the Definition of an Ideal, *A. G. Webster* and *M. A. Rosanoff*, 304.

Gas Radiation, The Exponent of, *W. J. Humphreys*, 83.

Gases, Absorption of, by the Anode in a Glow Current, *V. L. Chrisler*, 461.

Gases, The Molecular and the Frictional Flow of, in Tubes, *Willard J. Fisher*, 325.

Gas Viscosity, IV., The Temperature Coefficients of, *Willard J. Fisher*, 147.

Gibbs-Helmholtz, Application of, Equation to Concentration Cells, *Frank J. Mellencamp*, 329.

Glass, A Thermoluminescent, *Wm. W. Coblentz*, 561.

H.

Hale, C. F., The Nozzle Expansion of Air at High Pressure, 258.

Ham, Wm. R., Polarization of Röntgen Rays, 554.

Depth of Complete Scattering of Kathode Rays in Lead and Variation of the Depth with Velocity of the Rays, 554.

Heat of Dilution of Zinc Amalgams, *W. D. Henderson*, 507.

Henderson, W. D., The Heat of Dilution of Zinc Amalgams, 507.

Hiatt, C. E., A Thermo-hysteretic Frequency Meter and the Application of Differential Thermo-junctions to A.C.–D.C. Comparison, 432.

Humphreys, W. J., Distribution of Gases in the Atmosphere, 83.

The Exponent of Gas Radiation, 83.

I.

Incandescent Cathode, The Effect of Electrical Oscillations on the Conductivity Imparted to Gases by an, *Orin Tugman*, 154.

Inductance, The Residual of, and Capacity in Resistance Coils. A Standard Resistance with Balanced Inductance and Capacity, *S. LeRoy Brown*, 369.

Ingersoll, L. R., A Study of the Reflecting Power of Metals as Dependent on the Refractive Index of the Surrounding Medium, 392.

Interference, Achromatism of, *C. W. Chamberlain*, 84.

Iron, The Ballistic Electrodynamometer as an Instrument for Testing, *Martin E. Rice* and *Burton McCollum*, 132.

Iron Pyrites, Crystal Rectifiers for Electric Currents and Electric Oscillations, Part III., *George W. Pierce*, 487.

Irving, T. P., On the Electrical Character of the Source of Light Radiation, 243.

K.

Kathode Rays, Depth of Complete Scattering of, in Lead and Variation of the Depth with Velocity of the Rays, *Wm. R. Ham*, 554.

Kuehne, J. M., On the Electrostatic Effect of a Changing Magnetic Field, 558.

Kunz, Jakob, On the Photoelectric Effect of Sodium-Potassium Alloy and its Bearing on the Structure of the Ether, 212.

On the Photoelectric Properties of Sodium-Potassium Alloy, 174.

L.

Laird, Elizabeth R., Ionization Produced by Entladungsstrahlen and Experiments on the Nature of the Radiation, 559.

Laboratory Applications of the Photo-electric Current, *F. K. Richtmyer*, 562.

M.

McCollum, Burton, The Ballistic Electrodynamometer as an Instrument for Testing Iron, 132.

McComb, Harold E., Dispersion of Electric Double Refraction and Ordinary Dispersion in Liquids, 525.

McDowell, Louise S., Some Electrical Properties of Selenium, I., 1.

McLennan, J. C., On the Electric Charges acquired by Insulated Potassium Salts and other Radioactive Substances in High Vacua, 489.

Magnetic Double Refraction, Dispersion of, in Liquids Compared with that of Electric Double Refraction, *C. A. Skinner*, 541.

Magnetic Measurements, Methods and Errors in, *Charles W. Burrows*, 84.

Mellencamp, Frank J., Application of Gibbs-Helmholtz Equation to Concentration Cells, 329.

Millikan, R. A., The Absence of Photo-electric Fatigue in a Very High Vacuum, 85.

A Modification of the Cloud Method of Measuring the Elementary Electrical Charge, and the Most Probable Value of that Charge, 560.

N.

Neodymium Bands, The Effect of NO_3 and Al on the Uranyl Bands and of Ca and Temperature on, *W. W. Strong*, 555.

P.

Photo-electric Current, The Dependence of the, on Light Intensity, *F. K. Richtmyer*, 71.

Photo-electric Current, Laboratory Applications of the, *F. K. Richtmyer*, 562.

Photo-electric Currrent, The Dependence of, on Wave-Length of Incident Light, *F. K. Richtmyer*, 561.

Photo-electric Effect, On the, with the Alkali Metals, II., *F. K. Richtmyer*, 404.

Photo-electric Effect, of Sodium-Potassium Alloy and its Bearing on the Structure of the Ether, *Jakob Kunz*, 212.

Photo-electric Fatigue, The Absence of, in a Very High Vacuum, *R. A. Millikan* and *G. Winchester*, 85.

Photo-electric Properties of Sodium-Potassium Alloy, *Jakob Kunz*, 174.

Pierce, George W., Crystal Rectifiers for Electric Currents and Electric Oscillations. Part III., Iron Pyrites, 487.

The Electrolytic Detector, Studied with the Aid of an Oscillograph, 56.

Polarization of Röntgen Rays, *Wm. R. Ham*, 554.

Positive Ions, The Kinetic Energy of the, Emitted from Hot Bodies, *F. C. Brown*, 86.

Potassium, On the Possible Radioactivity of, *W. W. Strong*, 170.

Potassium Salts, On the Electric Charges acquired by Insulated, and other Radioactive Substances in High Vacua, *J. C. McLennan*, 489.

R.

Rectifiers, Crystal and Solid Contact, *Alan E. Flowers*, 445.

Reflecting Power of Metals, A Study of the, as Dependent on the Refractive Index of the Surrounding Medium, *L. R. Ingersoll* and *R. T. Birge*, 392.

Resistance Coils, The Residual of Inductance and Capacity in, A Standard Resistance with Balanced Inductance and Capacity, *S. LeRoy Brown*, 369.

Resolving Power, A Spectroscope of High, *C. W. Chamberlain*, 87.

Rice, Martin E., The Ballistic Electrodynamometer as an Instrument for Testing Iron, 132.

Richardson, O. W., The Kinetic Energy of the Thermions, 556.
The Reflection of Low-Speed Electrons by Metal Surfaces, 557.
Richtmyer, F. K., Laboratory Applications of the Photo-electric Current, 562.
On the Photo-electric Effect with the Alkali Metals, II., 404.
The Dependence of the Photo-electric Current on Light Intensity, 71.
The Dependence of Photo-electric Current on Wave-Length of Incident Light, 561.
Röntgen Rays, Polarization of, *Wm. R. Ham*, 554.
Rosanoff, M. A., On the Definition of an Ideal Gas, 304.
Rubidium, On the Possible Radioactivity of, *W. W. Strong*, 170.
Radioactivity, On the Possible, of Erbium, Potassium and Rubidium, *W. W. Strong*, 170.
Radioactivity, On the Electric Charges acquired by Insulated Potassium Salts and other Radioactive Substances in High Vacua, *J. C. McLennan*, 489.
Radiation, On the Electrical Character of the Source of Light, *T. P. Irving*, 243.
Radium, On the Secondary Radiation Produced from Solids, Solutions, and Pure Liquids, by the β Rays of, *S. J. Allen*, 177.

S.

Secondary Radiation, Produced from Solids, Solutions, and Pure Liquids, by the β Rays of Radium, *S. J. Allen*, 177.
Selenium, I., Some Electrical Properties of, *Louise S. McDowell*, 1.
Sodium-Potassium Alloy, On the Photo-electric Effect of, and its Bearing on the Structure of the Ether, *Jakob Kunz*, 212.
Skinner, C. A., Dispersion of Magnetic Double Refraction in Liquids Compared with that of Electric Double Refraction, 541.
Sodium-Potassium Alloy, Photo-electric Properties of, *Jakob Kunz*, 174.
Spectroscope, A, of High Resolving Power, *C. W. Chamberlain*, 87.
Spectral Energy Curves, A Characteristic of, *W. W. Coblentz*, 553.
Steel, The Secular Softening of Hard, *C. Barus*, 516.
Steel, The Softening of Cold, Glass-Hard in Twenty-Four Years, *Laura C. Brant*, 494.
Strong, W. W., The Effect of NO_3 and Al on the Uranyl Bands and of Ca and Temperature on Neodymium Bands, 555.
On the Possible Radioactivity of Erbium, Potassium and Rubidium, 170.

T.

Thermions, The Kinetic Energy of the, *O. W. Richardson*, 556.
Thermo-junctions, A Thermo-hysteretic Frequency Meter and the Application of Differential, to A.C.–D.C. Comparison, *C. E. Hiatt*, 432.
Tugman, Orin, The Effect of Electrical Oscillations on the Conductivity Imparted to Gases by an Incandescent Cathode, 154.

U.

Uhler, H. S., On the Rotation of Constant Deviation Prisms, 37.
Uranyl Bands, The Effect of NO_3 and Al on the, and of Ca and Temperature on Neodymium Bands, *W. W. Strong*, 555.

V.

Vector Representation of Non-harmonic Alternating Currents, *Bunroku Arakawa*, 409.
Vibrators, A Systematic Study of, and Receivers for Short Electric Waves, *Harold W. Webb* and *L. E. Woodman*, 89.

W.

Water, The Critical Density of, *Harvey N. Davis*, 81.

Webb, Harold W., A Systematic Study of Vibrators and Receivers for Short Electric Waves, 89.
Webster, A. G., On the Definition of an Ideal Gas, 304.
Winchester, G., The Absence of Photo-electric Fatigue in a Very High Vacuum, 85.
Woodman, L. E., A Systematic Study of Vibrators and Receivers for Short Electric Waves, 89.

Z.

Zinc Amalgams, The Heat of Dilution of, *W. D. Henderson*, 507.

ERRATA.

Page 286, the upper figure is Fig. 7; the lower figure is Fig. 6.

Page 325, the left side of the second equation should read pF instead of F.

Page 326, eighth line from bottom, interchange 1 and c_1/c_2.
